**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 8-11 and 20-26 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 6,397,361 to Saitoh is the reference closest to the claimed invention. Saitoh discloses a method of testing a semiconductor chip having a plurality of common I/Os associated therewith, the method comprising the steps of: connectivity testing a chip-to-package connection of at least one of the common I/O of the plurality of common I/Os, wherein said connectivity testing comprises generating a transition signal from a driver of the common I/O, and wherein the driver is configured as a weak driver that is sensitive to capacitive loading; determining whether the chip-to-package connection is faulty from a result of the connectivity testing. However, Saitoh does not teach placing additional impedance into connection with the driver prior to generating the transition signal; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
